Dear Friends:

In this, our 12th spring price list, we give everything we have left for spring sales. The stock is of the best quality and all items offered come up to "The Standard of Excellence in Ornamentals" of Princeton Products.

The new feature we started last fall of giving the approximate height the plant reaches at maturity after the botanical name, and a short description emphasizing the chief qualities or characteristics of the plant, has been a success and a big help in placing orders. It makes the price list a complete, handy, pocket-reference book.

We look forward with pleasure towards filling your wants again and invite you to visit us at any time. If you are too far away to come by auto, take the Pennsylvania Railroad to Princeton Junction where we will meet you by appointment or when notified by phone.

Prospects for Spring business are very bright and we wish you all a very profitable season.

Yours very truly,

PRINCETON NURSERIES,

WILLIAM FLEMER, Jr.,

Manager.

Office and grounds, Princeton Nurseries.

Members: American Association of Nurserymen.

Eastern Nurserymen's Association.

New Jersey Nurserymen's Association.

Quotations, prices, and grading are based on HORTICULTURAL STANDARDS adopted by the American Association of Nurserymen, June 1923.

## PRICES

Prices are as low as is consistent with the market, taking into consideration that the stock offered is of the best quality, carefully grown, with ample room for full development. Princeton grown stock should not be compared with poorly grown plants often offered. Prices are for Spring 1926.

---

## CREDIT

To established nurserymen known to us, a credit of 2% 10 days, 1% 30 days, or 60 days net from date of invoice will be allowed. Cash before shipment is required from parties unknown to us, and in these cases, one-half the regular charge is made for boxes or bales.

Packing house and storage cellar, Princeton Nurseries. They are on our own siding which insures the minimum of exposure when loading and facilitates rapid shipment. We specialize in carload orders for which no charge is made for packing.

### LIABILITY AND CLAIMS

We are not liable for injury to stock from frost, hail, fire, or other causes beyond our control, and book all orders with this understanding. Errors made by us will be gladly corrected, but complaints must be made within ten days time after receipt of stock.

Plants become your property upon delivery to transportation company, and we cannot be responsible for loss, damage, or delay in transit.

After the botanical name, in the following pages, we have embodied a new feature of giving the approximate height the plant attains at maturity; and a short description, giving the chief quality or characteristic of the plant, feeling that it would be a help to you in making up your order.

Princeton Nurseries employ no agents.

All stock offered herein is grown on our own nurseries under our own direct supervision.

Add 50 cents for each additional 2 feet of length.

Decreases are in the same proportion, 50 cents for each 2 feet.

## DECIDUOUS TREES

**NOTE:** The figures in italics, following each variety, indicate in feet the approximate height of that variety when mature. It must be understood, however, that many varieties in their native habitat greatly exceed this height, but soil and climatic conditions modify their growth and character to a variable extent, and allowance for this has been made in the heights given here.

## DECIDUOUS SHRUBS

Our methods of lining out and cutting back insure the kind of full, bushy plant which really is the standard of excellence,—a young, thrifty shrub, graded liberally.

Nearly all shrubs are dug with a tree-digger which means good roots, and lots of them.

The figures in italics, following each variety, indicate in feet the approximate height of that plant when mature.

**FRENCH LILACS—NAMED VARIETIES**

These are all grown from cuttings and are on their own roots, which is the best way Lilacs can be grown, as they will not sucker. It is the most expensive way to grow them, but our prices compare favorably with the cheap, grafted stock. These named Lilacs

generally grow from 6'-12' in height, depending on the variety and locality.

Two year Apples, grown at Princeton. Our fruit trees are clean, fully up to size, and true to name. We do not grow immense quantities of fruits, but have enough to supply the needs of customers who want a medium quantity to go in an assortment order. By growing them ourselves, we can stand back of them and know that we are delivering the right kind of stock.
